

# INDEX

## **CHAPTER - 1 - INTRODUCTION OF DBMS**

- 1.1** Introduction
- 1.2** Importance of Dbms
- 1.3** Evaluation of Dbms
- 1.4** Objective of Dbms
  - 1.4.1 Objective Types In Database
- 1.5** Database Structure Types
  - 1.5.1 Advantages And Disadvantages of Relational Databases
  - 1.5.2 The Advantages And Disadvantages of Nonrelational Databases
  - 1.5.3 Types of Database Users
  - 1.5.4 Types of Databases
- 1.6** The Dbms Environment
- 1.7** Database Applications
- 1.8** Advantages of A Dbms Over A File System
- 1.9** Architecture of A Database Management System (Dbms).
- 1.10** Dbms – Three-Level Architecture
- 1.11** Vendors of Dbms Systems And Their Products

## **CHAPTER 2 DATA BASE DESIGN AND DATA MODELS**

- 2.1** Introduction
- 2.2** The Life Cycle of Database Creation
- 2.3** Techniques For Database Design
- 2.4** Database Design: Steps To Creating A Database
- 2.5** Introduction of Er Model
  - 2.5.1 Entity
  - 2.5.2 Attribute
  - 2.5.3 Relationship
  - 2.5.4 Participation Constraint
- 2.6** Notation of Er Diagram
- 2.7** Keys in Relational Database Management Systems
- 2.8** Additional E-R Model Features
- 2.9** Conceptual Design With E-R Data Model
- 2.10** Conceptual Design For Large Enterprise
- 2.11** Introduction To Data Models In Dbms
- 2.12** View of Data in Dbms
  - 2.12.1 Abstraction is Divided Into Three Levels
  - 2.12.2 Data Model Schema And Instance
- 2.13** Data Independence
- 2.14** Three-Schema Architecture And Data Independence

## **CHAPTER - 3 - RELATIONAL MODEL**

### **3.1 Introduction**

### **3.2 Codd Principles**

### **3.3 Constraints Over Relational Database Model**

#### **3.3.1 Domain Constraints**

#### **3.3.2 Entity Integrity Constraints**

#### **3.3.3 Referential Integrity Constraints**

### **3.4 Data Integrity**

#### **3.4.1 Types Of Data Integrity**

### **3.5 Data Integrity Is Enforced By Database Constraints Structure of Relational Database**

### **3.7 Database Scheme**

### **3.8 Types of Key**

### **3.9 Relational Query Languages**

### **3.10 Logical Database Design**

#### **3.10.1 Structure of Logical Database**

#### **3.10.2 Goal of Logical Database**

#### **3.10.3 Tasks of Logical Database**

#### **3.10.4 Logical Database Data View**

#### **3.10.5 Advantages Of Logical Database**

#### **3.10.6 Disadvantages Of Logical Database**

### **3.11 Er Model To Relational Model**

## **CHAPTER - 4 - RELATIONAL ALGEBRA AND RELATIONAL CALCULUS**

### **4.1 Introduction of Relational Algebra**

#### **4.1.1 Joins**

### **4.2 Relational Calculus**

#### **4.2.1 TRC**

#### **4.2.2 DRC**

## **CHAPTER - 5 - BASIC OF SQL**

### **5.1 Introduction To SQL**

### **5.2 Role Of Sql In Rdbms**

### **5.3 Processing Skills Of SQL**

### **5.4 Components Of SQL**

#### **5.4.1 Data Definition Language**

#### **5.4.2 Data Manipulation Language**

#### **5.4.3 Data Control Language**

#### **5.4.4 Transactional Control Language**

#### **5.4.5 Data Query Language**

### **5.5 SQL Data Types**

### **5.6 SQL Functions**

#### **5.6.1 AGGREGATE FUNCTIONS**

#### **5.6.2 SCALAR FUNCTIONS**

### **5.7 TYPE OF CONSTRAINTS**

### **5.8 JOIN EXPRESSIONS**

#### **5.8.1 UNION, INTERSECT, AND EXCEPT**

### **5.9 INTRODUCTION OF VIEWS**

### **5.10 SQL - TRANSACTIONS**

- 5.11 NESTED QUERIES**
- 5.12 CORRELATED NESTED QUERIES**
- 5.13 AGGREGATE OPERATORS**
- 5.14 GROUP BY AND HAVING CLAUSES**
- 5.15 NULL VALUES**
- 5.16 Complex Integrity Constraints In Sql**
  - 5.16.1 Constraints over A Single Table
  - 5.16.2 Domain Constraints And Distinct
  - 5.16.3 Assertions: ICS Over Several Tables

## **CHAPTER – 6 - PL/SQL AND ADVANCED SQL**

- 6.1 Introduction To PL/SQL**
- 6.2 Pl/Sql Features Include**
- 6.3 Structure Of PL/SQL Block**
- 6.4 Pl/Sql Identifiers**
- 6.5 Cursors In PL/SQL**
  - 6.5.1 Types Of Cursors
- 6.6 PL/SQL – Procedures**
- 6.7 Olap Queries In SQL**
- 6.8 Introduction To Recursive SQL**
- 6.9 Triggers And Active Databases**
- 6.10 Designing Active Databases**

## **CHAPTER – 7 - QUERY PROCESSING**

- 7.1 Introduction**
- 7.2 Query Processing Measures Of Query Cost**
- 7.4 Selection Operation**
  - 7.4.1 Indexed Selection Operation
  - 7.4.2 Comparisons In Selection Operations
  - 7.4.3 Putting Complex Selection Operations In Place
- 7.5 Cost Estimation**
- 7.6 Hash Join Algorithm**
- 7.7 Recursive Partitioning In Hash Join**
- 7.8 Overflows In Hash Join**
  - 7.8.1 Handling Overflows
- 7.9 Evaluation Of Expressions**
  - 7.9.1 Materialization
  - 7.9.2 Pipelining
- 7.10 Cost Estimation Of Materialized Evaluation**

## **CHAPTER - 8 - QUERY OPTIMIZATION**

- 8.1 Introduction**
- 8.2 Types Of Query Optimization**
  - 8.2.1 Cost-Based Optimization (Physical)
  - 8.2.2 Dynamic Programming
  - 8.2.3 Heuristic Optimization (Logical)

### **8.3 Transforming Relational Expressions**

#### 8.3.1 Changing Relational Expressions

### **8.4 Equivalence Rules**

### **8.5 Estimating Statistics Of Expression Results In Dbms**

### **8.6 Choice Of Evaluation Plans In Dbms**

### **8.7 Advanced Query Optimization**

#### 8.7.1 Top-K Optimisation

#### 8.7.2 The Halloween Problem

#### 8.7.3 Multi-Query Optimization And Shared Scans

## **Chapter- 9 - Schema Refinement**

### **9.1 Problems Caused By Redundancy**

### **9.2 Decompositions**

### **9.3 Problems Related To Decomposition**

### **9.4 Functional Dependencies**

### **9.5 Reasoning About Fds**

### **9.6 Attribute Closure**

### **9.7 Normal Forms**

#### 9.7.1 First Normal Form(1nf)

#### 9.7.2 Second Normal Form (2nf)

#### 9.7.3 Third Normal Form (3nf)

#### 9.7.4 Boyce And Codd Normal Form(Bcnf)

#### 9.7.5 Properties Of Decompositions

### **9.8 Schema Refinement In Database Design**

#### 9.8.1 Relationship Set Constraints

#### 9.8.2 Identifying Attributes Of Entities

#### 9.8.3 Identifying Entity Sets

### **9.9 4nf (Fourth Normal Form) Rules**

### **9.10 5nf (Fifth Normal Form) Rules**

### **9.11 6nf (Sixth Normal Form)**

## **Chapter - 10 - Transaction Management**

### **10.1 Introduction**

### **10.2 Transaction Concept**

### **10.3 A Simple Transaction Model**

### **10.4 Storage Structure**

### **10.5 Transaction Atomicity And Durability**

### **10.6 Transaction Isolation**

### **10.7 Serializability**

### **10.8 Transaction Isolation Levels**

### **10.9 Implementation Of Isolation Levels**

#### 10.9.1 LOCKING

#### 10.9.2 TIMESTAMPS

## **CHAPTER - 11 - CONCURRENCY CONTROL**

### **11.1 Lock-Based Protocols**

### **11.2 Locks**

#### **11.2.1 Granting Of Locks**

### **11.3 Starvation**

### **11.4 The Two-Phase Locking Protocol**

### **11.5 Implementation Of Locking**

### **11.6 Graph-Based Protocols**

### **11.7 Dead Lock Handling**

#### **11.7.1 Dead Lock Prevention**

#### **11.7.2 Deadlock Detection**

#### **11.7.3 Recovery From Deadlock**

### **11.8 Multiple Granularities**

### **11.9 Timestamp-Based Protocols**

### **11.10 Validation-Based Protocols**

## **CHAPTER - 12 - RECOVERY SYSTEM & DATA ON EXTERNAL STORAGE**

### **12.1 Failure Classification**

### **12.2 Storage**

### **12.3 Recovery And Atomicity**

#### **12.3.1 Log Records**

#### **12.3.2 Database Modification**

#### **12.3.3 Concurrency Control And Recovery**

#### **12.3.4 Transaction Commit**

#### **12.3.5 Using The Log To Redo And Undo Transactions**

### **12.4 Recovery Algorithm**

### **12.5 Buffer Management**

### **12.6 Failure With Nonvolatile Storage Loss 2**

### **12.7 ARIES**

#### **12.7.1 ARIES**

#### **12.7.2 Recovery Algorithm**

#### **12.7.3 Other Characteristics**

### **12.8 Remote Backup Methods**

### **12.9 File Organizations And Indexing**

### **12.10 Index Data Structures**

### **12.11 Comparison Of File Organizations**

#### **12.11.1 Cost Model**

### **12.12 Indexing Based On Tree Structure**

#### **12.12.1 Introduction**

#### **12.12.2 Considerations For Overflow Pages And Locking**
